

Hole Cleaners are used to remove spoil from holes after drilling to create a clean & flattened base. Digga Hole Cleaners can be fitted with either a fixed or removable shaft. Ideal application includes installation of piers and concrete foundations. Suitable for machines up to 10 tonnes.

Features:

- Clears auger spoil leaving a clean & flattened base
- Shaft options include fixed and removable (For ease of storage & transportation)
- Removable shaft can double up as an extension

Ideal Use:

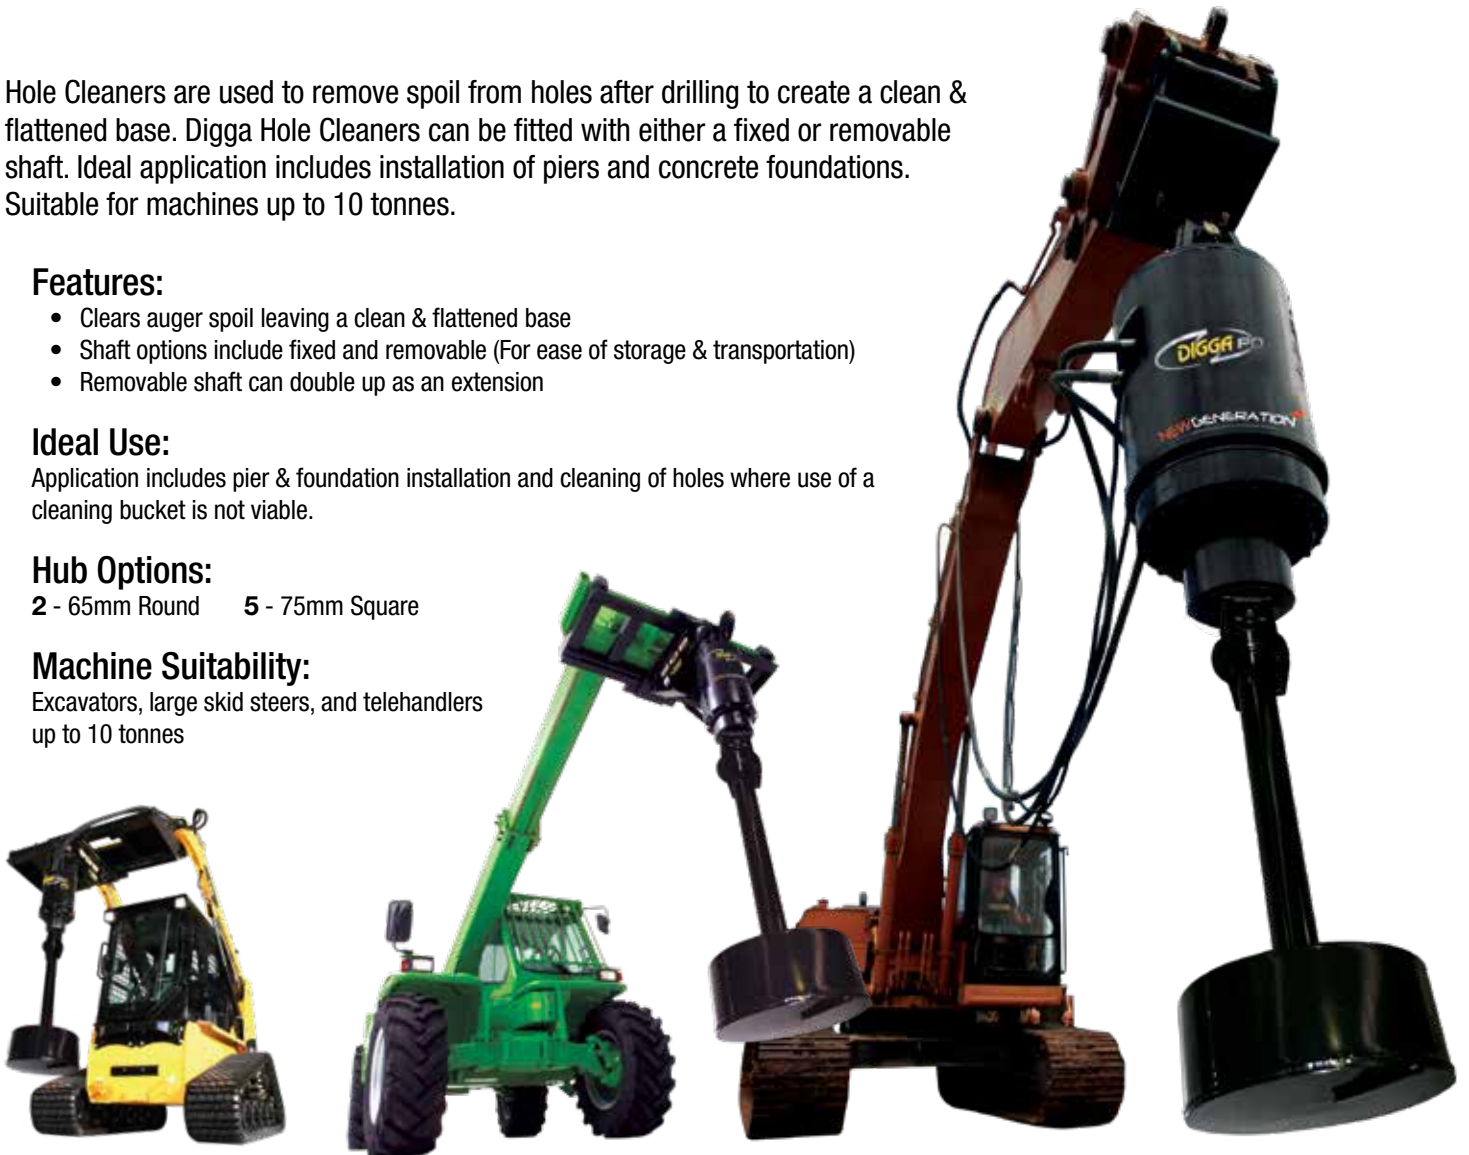

Application includes pier & foundation installation and cleaning of holes where use of a cleaning bucket is not viable.

Hub Options:

2 - 65mm Round 5 - 75mm Square

Machine Suitability:

Excavators, large skid steers, and telehandlers up to 10 tonnes

OAL	Sizes Available	Shaft Type	Hub Options	Drive Compatibility
